

# EssenSeal

Thymol  Tea Tree  Eugenol   
Outperforms the standards\*

Much more than a standard zinc oxide eugenol based cement, EssenSeal® is the synthesis of decades of know-how of Produits Dentaires SA for uncompromising obturation treatment.\* compliant with the standard ISO 6876:2012 Dentistry - Root canal sealing materials

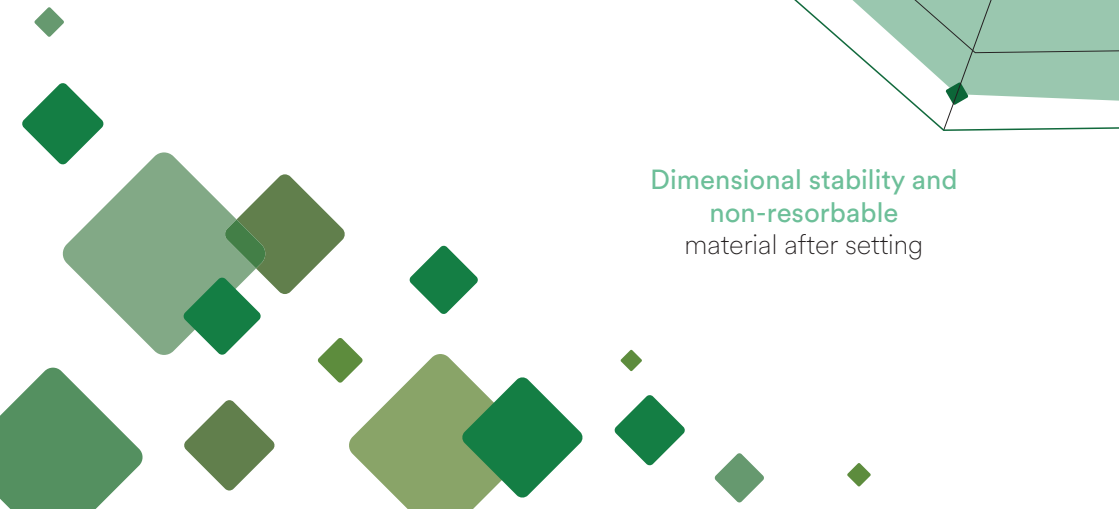

**Creamy & Smooth**  
thanks to optimi  
granulom

**Easy removal ability**  
of the cement for unstress  
retreatment

**Exemplary white coloration**  
to avoid any tooth staining

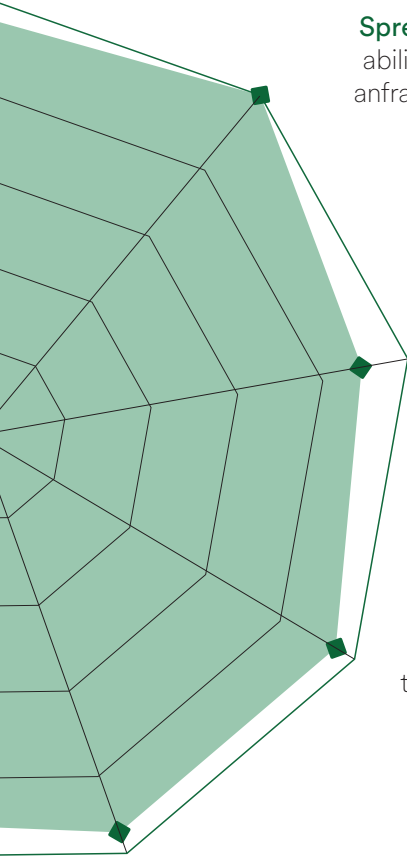

**Highly radio-opaque sealer**  
for precise follow-up

**Dimensional stability and  
non-resorbable**  
material after setting

## High consistency

Uniformly sized particles  
Optimal geometry

## Spreading and penetration
